EDUCATION

Vivekanand Education Society's Institute of Technology (VESIT)

B.Tech in Information Technology, Mumbai University; CGPA: 9.03

Mumbai, India

Sept 2024 – Present

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML/CSS

Frameworks & Tools: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, Firebase, Supabase

Other: Git, GitHub, VS Code, MongoDB Atlas, Cloudinary

EXPERIENCE

Electrolyte Solutions

Mumbai

Software Development Intern

Oct 2025 – April 2026

- Redesigned and optimized internal application workflows for the Bajaj project, improving usability and reducing task completion time for end users.
- Built and enhanced TagEntry and OCR-based document scanning features, increasing structured data capture accuracy and reducing manual data entry.
- Partnered with frontend and backend engineers to resolve UI/UX issues and ship performance improvements across the application.

Kukreja – WASTec Project

Mumbai

Web Development Intern

Dec 2025 – Jan 2026

- Built and shipped pages for an eco-friendly e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Researched and integrated AI tools and modern web technologies to improve site performance and user experience.
- Prepared technical documentation and live demo prototypes for company workshops, and supported participants through hands-on troubleshooting.

LEADERSHIP

ISTE – VESIT

Mumbai

SE Technical Officer

Sept 2024 – Present

- Built and tested project prototypes used for live demonstrations at technical workshops and events.
- Created documentation and training material for technical and non-technical workshops, helping participants troubleshoot issues in real time.

PROJECTS

NagarVaani – AI Civic Grievance Platform | *React.js, Node.js, Supabase, Gemini API, Leaflet*

[Github](#)

- Developed an AI-powered civic grievance platform that aggregates complaints from multiple sources and automates issue categorization through intelligent workflows.
- Built AI-driven complaint deduplication, clustering, spam filtering, multilingual support, and predictive insights, **reducing redundant reports** and improving transparency.
- Implemented an **Aam Aadmi Trust Score (AATS)**, crowd validation, AI-based proof-of-resolution with GPS verification, and secure whistleblower reporting using hybrid encryption.
- Designed a scalable full-stack architecture with React, Express, and Supabase, featuring interactive maps and analytics dashboards for real-time complaint tracking.

NexusAgent – AI IT Support Automation | *FastAPI, React.js, Gemini Pro, n8n*

[Github](#)

- Developed an AI-powered IT support platform that converts WhatsApp and Email queries into structured support tickets using Agentic AI and automated workflows.
- Integrated **Google Gemini Pro** with guardrails for intelligent extraction of ticket summary, category, priority, and sentiment, enforcing strict JSON schema validation for reliable AI outputs.
- Automated end-to-end ticket creation using **n8n**, webhook integrations, and asynchronous FastAPI services, **reducing manual support effort** and enabling real-time processing.
- Built an interactive React admin dashboard with live ticket monitoring, analytics, and one-click Excel export, with fail-safe mechanisms for manual review when AI confidence is low.

ACHIEVEMENTS

4th Position – Nirman National-Level Hackathon

Top 6 Finalist – Genesis Hackathon, VESIT
